

TIME AND DISTANCE

Type-1

1. If the speed of a train is 90 km /hr, then what distance does it travel in 20 seconds?
1) 10 meters 2) 250 meters 3) 500 meters 4) 400meters
2. A train, which has 500 meter length, is running with 72 km /hr, then how much time does the train take to cross the electric pole?
1) 20 sec 2) 25 sec 3) 30sec 4) 40sec
3. A train, which has 1km length, is running with 40m/sec, then how much time does the train take to cross the telegraph pole?
1) 25 sec 2) 20 sec 3) 30 sec 4) 40 sec
4. A train, which has 600m length, is running with 40m/sec, then how much time does the train take to cross the bridge 400m length?
1) 15 sec 2) 30 sec 3) 20 sec 4) 25 sec
5. A train which has 700m length is running with 180 km /hr and crosses a bridge in 20 seconds, then what is the length of the bridge ?
1) 400m 2) 600m 3) 300m 4) 200m
6. A train running with 54 km/hr crosses a tunnel of 200 m length in 40 seconds, then find the length of train ?
1) 200m 2) 300m 3) 400m 4) 500m

Type-2

7. There are two railway parallel lines . On one parallel line a train, which has 600m length, is running with 40m/sec and on another parallel line second train, which has 400 m length, is running with 60 m/sec towards each other, then how much time do the train take to cross each other?
1) 15sec 2) 12sec 3) 10sec 4) 8sec
8. There are two railway parallel lines . On one parallel line a train, which has 700m length, is running with 60m/sec and on another parallel line second train, which has 400 m length, is running with 80 m/sec, in the same direction, then how much time do the trains take to cross each other?
1) 55 sec 2) 50 sec 3) $76\frac{7}{7}$ sec 4) None
9. A train, which has 600m length, is running with 40 m/sec. Beside the railway line one man is running in the direction of the train with 10m/sec, then how much time does the train take to cross that man?
1) 40sec 2) 30sec 3) 10sec 4) 20sec
10. A train, which has 800m length, is running with 60m/sec. Beside the railway line one man is running opposite to the direction of train with 20m/sec, then how much time does the train take to cross the man?
1) 15sec 2) 10sec 3) 20sec 4) 12sec

TIME AND DISTANCE

Type-3

11. The distance between the two railway stations 'A' and 'B' is 600 kms. One train starts from 'A' with 40km/hr and another train starts from 'B' with 60km/hr at the same time towards each other. At what distance from station 'A' do they cross each other?

1) 140 kms 2) 200 kms 3) 240 kms 4) 20 kms

12. The distance between the two railway stations A and B is 400 kms. One train starts from A with 40 km/hr at 8:00 A.M. and another train starts from B with 60 km/hr. at 9:00 A.M. towards each other. Then at what time do they cross each other?

1) 10:40 P.M. 2) 12:36 P.M. 3) 1:30 P.M. 4) None

13. There are two stations A and B. One car starts from 'A' with 60km/hr and another car starts from B at the same time with a certain speed towards each other. After crossing each other first car takes 3 hours to reach 'B' and second car takes 12 hours to reach 'A' , then find the speed of second car ?

1) 20 km/hr 2) 40 km/hr 3) 30 km/hr 4) 50 km/hr

14. There are two stations A and B first car starts from 'A' with a certain speed and second car starts from B with 40 km/hr towards each other. After closing each other first car takes 2 hours to reach B and second car takes 18 hours to reach A, Then find the speed of first car ?

1) 60km/hr 2) 120 km/hr 3) 100 km/hr 4) 80 km/hr

Type-4

15. If a person travels $\frac{3}{4}$ of his usual speed , he reaches 10 minutes late .Find usual time?

1) 20 min 2)40 min 3)30 min 4)50 min

16. If a person travels $1\frac{1}{2}$ of his usual speed, he reaches 10 minutes early, then find usual time?

1) 40 min 2) 20 min 3) 50 min 4) 30min

17. A man can reach a certain place in 30 hrs. If he reduces his speed by $\frac{1}{15}$ th he covers 10 km less in that time. Find his speed.

(a) 4 km/hr. (b) 5km/hr. (c) $5\frac{1}{2}$ km/hr. (d) 6 km/hr.

18. A car travelling at $\frac{5}{7}$ of its actual speed covers 42 km in 1 hour 40 min 48 second. Find the actual speed of the car?

(a) $17\frac{6}{7}$ km/hr. (b) 25 km/hr. (c) 35 km/hr. (d) 30 km/hr.

Type-5

19. A person travels on scooter from A to B half of the journey with 60km/hr and the rest with 40 km/hr, then find the average speed?

1) 24 km/hr 2) 48 km/hr 3) 36 km/hr 4) 50 km/hr

TIME AND DISTANCE

20. A person travels 600kms in 7hours and 400kms in 3 hours, then find the average speed?

1) 80km/hr 2) 100 km/hr 3) 50 km/hr 4) None

21. A car during its journey travels 40 minutes at a speed of 30 km/h, another 50 minutes at a speed of 60 km/h and 1 hour at a speed of 30 km/h. Find the average speed of the car ?

22. A man walks 6 km at a speed of $1\frac{1}{2}$ km/hr, runs 8 km at a speed of 2 km/h and goes by bus another 32 km. Speed of the bus is 8 km/hr. If the speed of the bus is considered as the speed of the man, find the average speed of the man?

Type-6

23. A train running with 20m/sec crosses a bridge in 30 sec and a man on the bridge does it in 10 sec. Find the bridge length?

1) 200m 2) 400m 3) 500 m 4) 600 m

24. A train of 700 m length running with certain speed crosses a bridge in 40 sec and a man on the bridge does it in 20 sec. find the train speed in km/hr?

1) 126 km/hr 2) 90 km/hr 3) 108 km/hr 4) 144km/hr

25. A train running with a certain speed crosses two tunnels of 100m and 200m length in 20 sec and 30 sec respectively. Find the train length ?

1) 300m 2) 150m 3) 200m 4) 100m

26. A train running with a certain speed crosses two tunnels of 200 m and 300m length in 30 sec and 40 sec respectively. Find the train speed in km/hr ?

1) 90 km/hr 2) 18 km/hr 3) 36 km/ hr 4) 72 km/hr

Type-7

27. A thief goes away with a Maruti car at a speed of 60km/hr. The theft has been discovered after half an hour and the owner sets off in another car with 75km/hr. After how many hours from the start does the owner over take the thief?

1) $1\frac{1}{2}$ hr 2) 2 hrs 3) $2\frac{1}{2}$ hrs 4) None

28. A thief steals 20km a car at 2:30 pm and travels with 40km/hr. After half an hour the owner sets off in another car and travels with 50 km/hr. At what time does the owner over take the thief ?

1) 4:00 PM 2) 5:30 PM 3) 5:00 PM 4) 4:30 PM

TYPE-8

29. Excluding stoppages, the speed of a train is 50 km/hr, and including stoppages it is 40 km/hr, then for how many minutes does the train stop per hour?

1) 15 min. 2) 12 min. 3) 20 min. 4) 30 min.

TIME AND DISTANCE

30. Excluding stoppages, the speed of a train is 45 km/hr and including stoppages the speed of a train is 36km/hr, then for how many minutes does the train stop per hour?

- 1) 20 min 2) 10 min 3) 15 min 4) 12 min

TYPE-9

31. A man takes 12 hours to walk to a certain place and ride back. How ever, if he walks both the ways he needs 3 hours more. How long would he take to ride both ways?

- 1) 5 hrs 2) 6 hrs 3) 9 hrs 4) 10 hrs

32. A man takes 13 hours to walk to a certain place and ride back. However, if he rides both the ways he takes 3 hours less. How long would he take to walk both ways?

- 1) 18 hrs. 2) 10 hrs. 3) 10hrs 4) 16hrs.

33. A man takes 6 hours and 30 mins for walking to a certain place and riding back respectively. He would have gained 2 hours 10 minutes by riding both ways. How long would he take to walk both ways?

- (a) 480 mins. (b) 520 mins. (c) 560 mins. (d) 600 mins

TYPE -10

34. A starts from a place P to go to a place Q. At the same time B starts from Q for P. If after meeting each other A and B took 4 and 9 hours more respectively to reach their destinations, the ratio of their speeds is

- (a) 3 : 2 (b) 5 : 2 (c) 9 : 4 (d) 9 : 13

35. Two trains A and B moves towards each other at the same time from different stations P and Q respectively. After meeting each other, the train A takes 2 hour 24 minutes to reach Q and the train B takes 4 hours 16 min. to reach the station P. If the speed of the train B is 60 km/h then find the speed of the train A ?

- (a) 80 km/h (b) 60 km/h (c) 70 km/h (d) 90 km/h

TYPE-11

36. Two guns were fired from the same place at an interval of 13 minutes but a person in a train approaching the place hears the second firing 12 minutes 30 seconds after the first. Find the speed of the train, supposing that sound travels at 330 meters per second.

- (a) $47 \frac{13}{25}$ km/hr (b) $45 \frac{13}{25}$ km/hr (c) $42 \frac{13}{25}$ km/hr (d) $44 \frac{25}{13}$ km/hr

37. A monkey tries to ascend a greased pole 14 meter high. He ascends 2 meter in first minute and slips down 1 meter in the second minute. If he continues to ascend in this fashion, how long does he take to reach the top?

- (a) 24 min (b) 25 min (c) 28 min (d) 32 min

TIME AND DISTANCE

38. Due to the technical snag in the signals system two trains start approaching each other on the same rail track from two different stations, 240 km away from each other. When the train starts a bird also starts moving to and fro between the two trains at 60 km/h touching each train each time. The bird is initially sitting on the top of the engine of one of the trains and it moves till these trains collide. If these trains collide one and a half hour after the start, then how many kilometers bird travels till the time of collision of the trains ?

(a) 90 km (b) 130 km (c) 120 km (d) none of these

39. While walking down one the pavements of New York city. I notice that every 20 minute there is a city bus coming in the opposite direction and every 30 minute there is a city bus overtaking me from behind. What is the time gap between one city bus passing a stationary point known as Local Bus Stop beside the route and immediately the next city bus in the same direction passing the same stationary point?

(a) 27 min (b) 24 min (c) 25 min (d) can't determined

40. Two rifles are fired from the same place at a difference of 11 minutes 45 seconds. But a man who is coming towards the place in a train hears the second sound after 11 minutes. Find the speed of train (assuming speed of sound = 330 m/s):

(a) 72 km/h (b) 36 km/h (c) 81 km/h (d) 108 km/h
