

TIME AND WORK

Type-1

1. A tyre has two Punctures. The first Puncture alone would have made the tyre flat in 9 minutes and second alone would have done it in 12 minutes. If air leaks out at a constant rate, how long it takes both the Punctures together to make it flat?

a) $6\frac{5}{7}$ minutes (b) $2\frac{5}{7}$ minutes (c) $1\frac{5}{7}$ minutes (d) 6 minutes

2. 'A' can do a work in 20 days and 'B' can do it in 30 days, then they together can do $\frac{3}{4}$ of work in how many days?

1) 6 days 2) 12 days 3) 9 days 4) 15 days

3. If A, B & C can do a work in 20 days, 30 days and 60 days respectively, then they together can do it in how many days?

1) 5 days 2) 8 days 3) 10 days 4) 12 days

4. Rakesh, Ashok and Raju can do a piece of work in 30, 45 and 60 days respectively. Working together, In how many days they will complete the Two-fifth work?

(a) 15 (b) $\frac{180}{31}$ (c) $\frac{72}{13}$ (d) $\frac{90}{31}$

5. Elan and Ronald working on an assignment. Ronald takes 6 hours to type 32 pages on a computer, while Elan takes 5 hours to type 40 pages. How much time will they take, working together on two different computers to type an assignment of 110 pages?

(a) 7 hours 30 minutes

(b) 8 hours

(c) 8 hours 15 minutes

(d) 8 hours 25 minutes

Type-2

5. A & B together can do a work in 10 days, B & C in 15 days, C & A in 20 days, then they together can do it in how many days?

1) $9\frac{1}{13}$ days 2) $10\frac{1}{13}$ days 3) $9\frac{3}{13}$ days 4) 9 days

6. A & B together can do a work in 6 days, B & C in 8 days, C & A in 12 days, then they together can do it in how many days?

1) $5\frac{1}{3}$ days 2) 4 days 3) $3\frac{1}{3}$ days 4) $4\frac{1}{3}$ days

7. A & B together can do a work in 20 days, B & C in 30 days, C & A in 60 days, then they together can do it in how many days?

1) 10 days 2) 50 days 3) 30 days 4) 20 days

TIME AND WORK

Type-3

8.A & B together can do a work in 20 days,B alone can do it in 30 days, then 'A' alone can do it in how many days?

1) 60 days 2) 40 days 3) 20 days 4) 30 days

9.A & B together can do a work in 10 days. A alone can do it in 15 days, then B alone can do it in how many days?

1) 20 days 2) 30 days 3) 60 days 4) 25 days

10. If A, B and C together can do a work in 20 days, B and C together can do it in 30 days, then A Alone can do it in how many days?

1) 120 days 2) 60 days 3) 12 days 4) 40 days

11.If A, B and C together can do a work in 10 days, A and C together can do it in 15 days, then B alone can do it in how many days?

1) 6 days 2) 40 days 3) 30 days 4) 60 days

12.A, B & C together can do a work in 5 days, B alone can do it in 10 days, C alone can do it in 15 days, then A alone can do it in how many days?

1) 30 days 2) 25 days 3) 20 days 4) 40 days

13.A, B and C together can do it in 4 days, A alone can do it in 8 days, B alone can do it in 12 days, then C alone can do it in how many days?

1) 18 days 2) 24 days 3) 16 days 4) 20 days

15.A & B together can do a work in 20 days, B&C in 30 days, C &A in 60 days, then B alone can do it in how many days?

1) 40 days 2) 50 days 3) 30 days 4) 20 days

Type-4

19.A and B can do a work in 10 days and 15 days, they together can do it for Rs.10000, then find B'S share?

1) Rs.3000 2) Rs.4000 3) Rs.6000 4) Rs.5000

20.A, B and C can do a work in 15 days, 20 days and 25 days respectively. They together can do it for Rs.47000, then find A'S share?

1) Rs.12000 2) Rs.15000 3) Rs.20000 4) None

21. The ratio of efficiencies of A, B and C is 2 : 3 : 4. A and C are busy somewhere so they work in alternate days. In this manner the work completed in 10 days. If they got Rs.1200 As wages then what is the share of each?

(a) 200 Rs. 600 Rs. 400 Rs. (b) 400 Rs. 400 Rs. 400 Rs. (c) 400 Rs. 600 Rs. 200 Rs. (d) None of these

TIME AND WORK

Type-5

22. If A is twice as good work man as B and therefore able to finish a work in 10 days less than B, then B alone can do it in how many days?

1) 10 days 2) 20 days 3) 15 days 4) 40 days

23.If A is half as much as again good work man as B, and therefore able to finish a work in 18 days less than B, then A alone can do it in how many days?

1) 18 days 2) 36 days 3) 54 days 4) 12 days

24.If A is twice as good a work man as B and they together can do it in 10 days, then A alone can do it in how many days?

1) 15 days 2) 20 days 3) 12 days 4) 18 days

Type-6

25.A and B can do a work in 10 days and 15 days respectively. They together start the work, after 2 days 'A' leaves, then the work can be done in how many days?

1) 6 days 2) 10 days 3) 12 days 4) 14 days

26.A and B can do a work in 20 days and 30 days respectively. They together start the work, after 3 days B leaves, then the remaining work can be done in how many days?

1) 12 days 2) 15 days 3) 18 days 4) 20 days

27.A machine P can print one lakh books in 8 hours, machine Q can print the same number of books in 10 hours while machine R can print them in 12 hours. All the machines are started at 9 p.m. while machine P is closed at 11 am and the remaining two machine complete the work.Approximately at what time will the work be finished?

(a) 11:30 a.m (b) 12 noon (c) 12:30 am (d) 1 p.m.

28. A and B can do a piece of work in 30 days, while B and C can do the same work in 24 days and C and A in 20 days. They all work together for 10 days after B and C leave. How many days more will A take to finish the work?

(a) 18 days (b) 24 days (c) 30 days (d) 36 days

Type-7

29. A and B can do a work in 10 days and 15 days respectively. First A start the work, after 3 days 'B' also joins with him, then the work can be done in how many days?

1) $6\frac{1}{5}$ days 2) $7\frac{1}{3}$ days 3) 7 days 4) $7\frac{1}{5}$ days

30. A and B can do a work in 20 days and 30 days respectively. First 'B' start the work, after 6 days 'A' also joins with him, then the remaining work can be done in how many days?

1) $15\frac{1}{5}$ days 2) $7\frac{1}{3}$ days 3) $9\frac{3}{5}$ days 4) $10\frac{3}{5}$ days

TIME AND WORK

TYPE-8

31. A and B can do a work in 10 days and 15 days respectively, they together start the work, after some days 'B' leaves, then the work is completed in 8 days. After how many days B leaves from the work?

1) 4 days 2) 2 days 3) 3 days 4) 5 days

32. A and B can do a work in 15 days and 20 days respectively. They together start the work, some days before the completion of work 'A' leaves, then the work is completed in 16 days. They together work for how many days?

1) 2 days 2) 3 days 3) 4 days 4) 5 days

TYPE-9

33. A, B & C can do a work in 20, 25, & 30 days respectively. They together start the work, after 2 days 'A' leaves, 3 days before completion of work 'B' leaves. Then the work is completed in how many days?

1) $13\frac{5}{11}$ days 2) $13\frac{7}{11}$ days 3) 4 days 4) $13\frac{10}{11}$ days

34. A, B, C and D can do a piece of work in 24, 16, 32 and 12 days respectively. If A started the work and after one day B and C also joined him. After two days of that A left the job and meanwhile D joined the work. If B and C left the work 2 days and 4 days respectively before the completion of work. Find how many days D had done the work?

(a) 4 days (b) $5\frac{8}{17}$ days (c) 5 days (d) $5\frac{5}{17}$ days

35. A can do a piece of work in 120 days while B can do it in 150 days. They started together and worked for 20 days after this B left the work and A continued it. 12 days after C joined A and the remaining work was completed in 48 days. How long will it take C to complete the work alone?

(a) 240 days (b) 210 days (c) 300 days (d) 160 days

TYPE-10

36. A and B can do a work in 10 days and 12 days respectively. The work on alternate days, if B starts the work then the work is completed in how many days?

1) 11 days 2) 10 days 3) $11\frac{1}{2}$ days 4) $10\frac{1}{2}$ days

37. A and B can do work in 15 days and 20 days respectively. Then work on alternate days, if A starts the work then the work is completed in how many days?

1) $16\frac{1}{2}$ days 2) 16 days 3) 17 days 4) $16\frac{1}{4}$ days

38. A, B and C can do a piece of work in 11 days, 20 days and 55 days respectively, working alone. How soon can the work be done if A assisted by B and C on alternate days?

(a) 7 days (b) 8 days (c) 9 days (d) 10 days

TIME AND WORK

TYPE-11

39) 4 men or 5 women can do a work in 22 days, then 2 men and 3 women can do it in how many days?

1) 12 days 2) 10 days 3) 21 days 4) 20 days

40) 2 men or 3 women or 4 boys can do a work in 26 days, then 1 man, 1 woman and 1 boy together can do it in how many days?

1) 24 days 2) 22 days 3) 20 days 4) $28\frac{1}{6}$ days

41. If 1 man or 2 women or 3 boys can complete a piece of work in 88 days then 1 man 1 woman and 1 boy together will complete it in

(a) 36 days (b) 42 days (c) 48 days (d) 54 days

TYPE-12

42. A group of men can do a work in 20 days, after 5 days they started the work 5 more men are joined, then the remaining work could be done in 5 days less. How many men are there in the group?

1) 10 men 2) 15 men 3) 5 men 4) 20 men

43. A certain number of men can do a work in 40 days, after 10 days they started the work 5 men leave the work, then the remaining work could be done in 5 days more. How many men are there?

1) 25 men 2) 30 men 3) 35 men 4) 40 men
