

BOAT AND STREAMS

Type-1

1. If man's rate in still water is 20kmph and velocity of water is 5kmph, then find downstream speed and upstream speed?

1) 25kmph, 15kmph 2) 20kmph, 25kmph 3) 15kmph, 25kmph 4) None

2.If boat's rate in still water is 10 kmph and stream rate is 3kmph then find downstream speed and upstream speed?

1) 12kmph, 8kmph 2)13kmph, 8kmph 3) 4kmph, 9kmph 4)13kmph, 7kmph

Type-2

3. If downstream speed is 30 kmph and upstream speed is 10kmph, then find man rate in still water and stream rate?

1) 25kmph, 15kmph 2)20kmph, 10kmph 3) 15kmph, 10kmph 4) 40kmph, 20kmph

4. If downstream speed is 20 kmph and upstream speed is 8kmph, then find boat's rate in still water and current rate?

1) 12kmph, 7kmph 2)13kmph, 8kmph 3) 14kmph, 6kmph 4) None

Type-3

5. If boat's rate in still water is 15 kmph and downstream speed is 20kmph, then find upstream speed?

1) 17.5 2) 5kmph 3) 12kmp 4) 10kmph

6. If the velocity of water is 8 kmph and upstream speed is 4 kmph, then find downstream speed?

1) 15 kmph 2) 20kmph 3) 12kmph 4) 10kmph

Type-4

7. If boat's rate in still water is 30kmph and current rate is 10kmph, then how much distance it travel in downstream in 5 hours?

1) 200kms 2)100kms 3)140kms 4)160kms

8.If man's rate in still water is 25kmph and stream rate is 5kmph then how much distance is travelled in upstream in 20 minutes?

1) 4kms 2) 6.6kms 3) 5.5kms 4) 7kms Type-5

Type-5

9)If boat's rate in still water is 15kmph and current rate is 5kmph, then how much time does it take to travel 60kms in downstream?

1) 5hrs 2) 4hrs 3) 2hrs 4) 3hrs

BOAT AND STREAMS

10. If man's rate in still water is 20kmph and current rate is 4kmph then how much time does he take to travel 32kms up stream?

- 1) $1\frac{1}{2}$ 2) 4hrs 3) 3hrs 4) 2hrs

Type-6

11. If man's rate in still water is 15kmph and current rate is 5kmph, and he takes 6hrs to row to a place and back. How far is the place?

- 1) 80kms 2) 20kms 3) 40kms 4) 10kms

12. 18kms distance is travelled with return journey in 10 hrs. If man's rate in still water is 10 kmph, then find velocity of water?

- 1) 8kmph 2) 10kmph 3) 5kmph 4) 7kmph

Type-7

13. A certain distance of downstream is covered in 10 hrs and the same distance up stream is covered in 15 hrs, the velocity of water is 5 kmph, then find man's rate in still water?

- 1) 20kmph 2) 25kmph 3) 30kmph 4) 15kmph

14. A man's rate in still water is 15kmph in the time taken by him to row up the river is twice the time taken to row down, then find the current rate?

- 1) 4 kmph 2) 7 kmph 3) 3 kmph 4) 5 kmph

Type-8

15. A person rows 2 kms down stream in 20 min and upstream in one hour. Find the velocity of the stream?

- 1) 4 kmph 2) 2 kmph 3) 1 kmph 4) 2 kmph

16. A man can row 30kms upstream and 44kms downstream in 10 hours. Also he can row 40 kms upstream and 55kms downstream in 13 hours. Find the rate of the current ?

- 1) 3 kmph 2) 2 kmph 3) 4 kmph 4) 1 kmph
